TrackLight

US Patent Number: 9835728

AnyTrek
Specialists in GPS Tracking Solutions

Tail/stop light covert GPS Trailer Tracker

Always know where your trailers, tankers and chassis are!

True Plug and Drive

Now available with clear lens

TrackLight looks and functions exactly the same as a standard 4" round LED tail lamp, providing the ultimate in covert tracking and simple installation. Designed to function in the harsh conditions on the road, it is waterproof and shock proof.

Inside the lamp case is a powerful GPS module connected via a 3G/4G modem, ensuring location updates are received reliably and accurately. The built-in Lithium Ion battery can provide up to 3 months of location reporting with automatic notifications of changed conditions when unpowered.

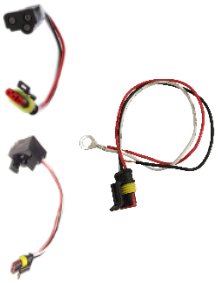
The TrackLight tracker is true plug and drive. Installation is as simple as replacing one of your own tail lamps, because that's all there is to it.

Accessories

Plastic – similar in colour to the TruckLite Model 44 light and ring combo, ideal wherever screws or rivets are the preferred mounting option.

PermaLok – permanent mounting ring to prevent your lights being removed. No drilling, screwing or riveting required.

Decoy – looks, installs and functions like a TrackLight, but without the tracking function. Makes the TrackLight blend in to keep it covert.



Pigtail/ Adaptors – Hard-Shell female pigtail, adaptors available for both Right Angle PL-3 and equilateral triangle Grote connectors.

Key Features

- Set maintenance reminders by mileage or time
- Free feature rich web portal for tracking, alerts, Landmarks
- True plug and drive, just swap out the existing light
- Uses standard hard shell plug, no extra wiring required
- Self-install, no special tools required; no cutting, drilling or splicing needed
- IP67 sealed enclosure
- Draws power from the brake and tail light circuits
- Future proof by utilizing the 3G/4G cellular network
- Internal Cellular and GPS antennas
- Super sensitive GPS tracking
- Ultra-low power save mode (1.2mA over 24 hours)
- 3-axis accelerometer for motion sensing
- Voltage monitoring and low battery notification
- 2,000 buffered reports when no cellular connection
- Report every 5 minutes when powered and moving
- Over-The-Air Firmware Upgrade

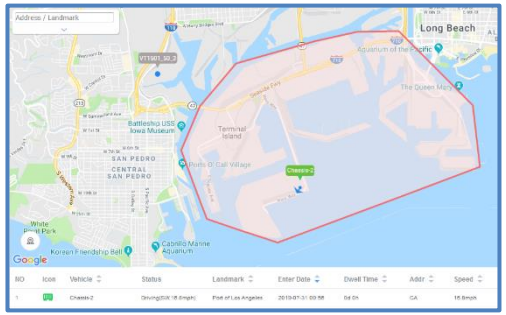
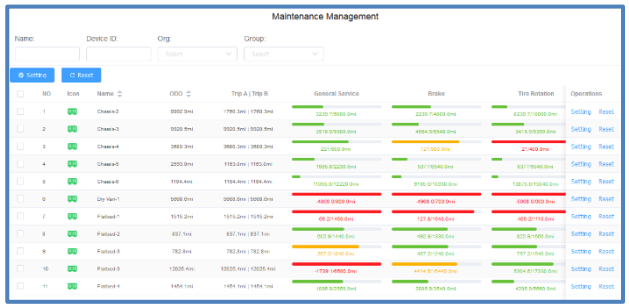
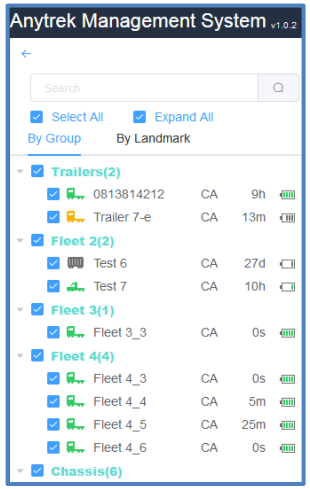
Monitoring Web Portal

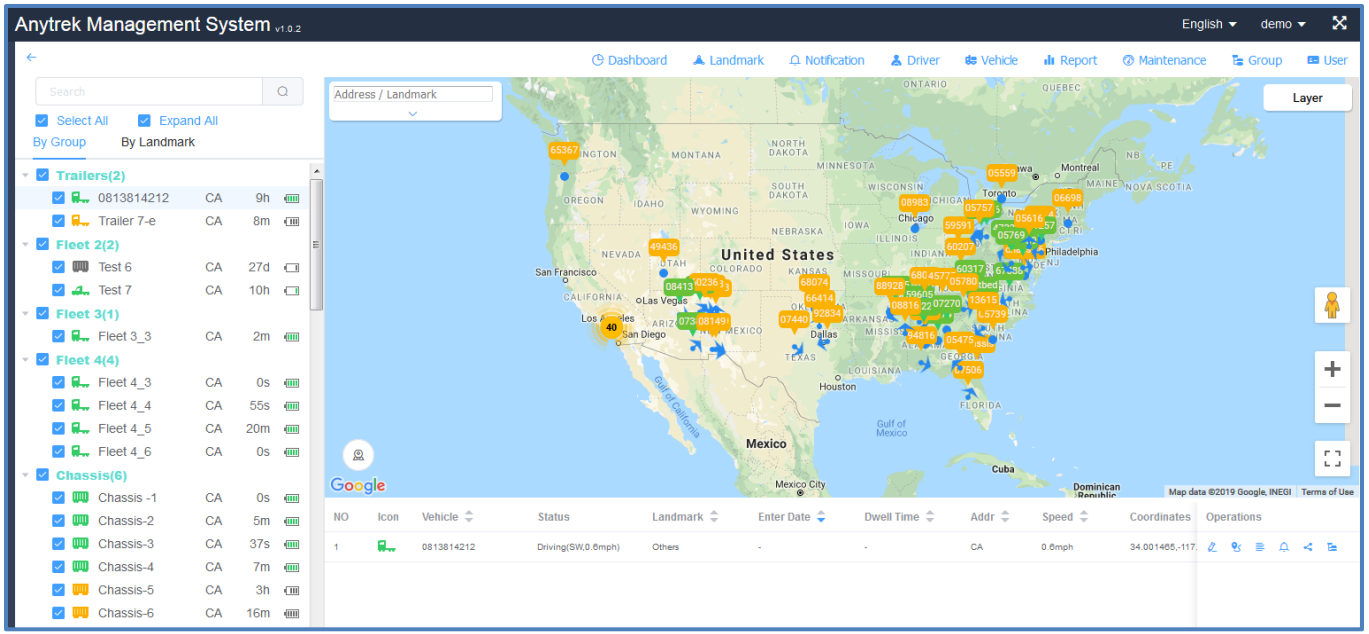
URL - fleet.anytrek.com

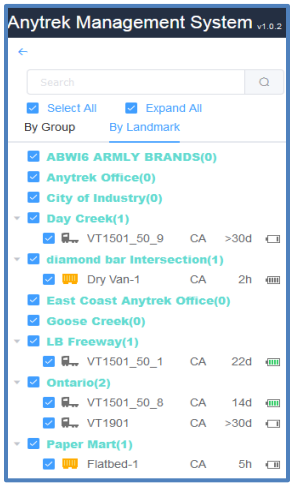


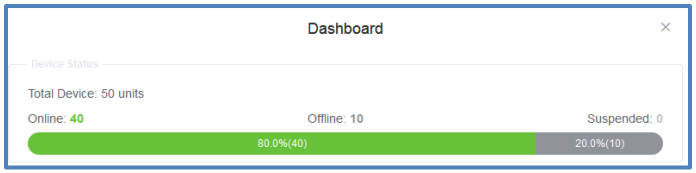
The Anytrek Web Portal is a feature rich tool to help you track and optimize the efficiency of your assets. Designed to enhance your business, it allows you to instantly see the status and location of your assets and schedule timely maintenance reminders based on distance or time. Customer service can be assisted with the ability to share a map screen showing the customer/broker the real-time progress of their load.











Multiple Landmarks can be defined to send alerts when assets are entering or exiting. Dwell times can assist in identifying under-utilized assets. Assets can be sorted by Groups or Landmarks. Users can be created to only see specific assets or groups.
The Dashboard provides a clear picture of the health and activity of your assets and trackers.
